

LOGIN / SIGNUP

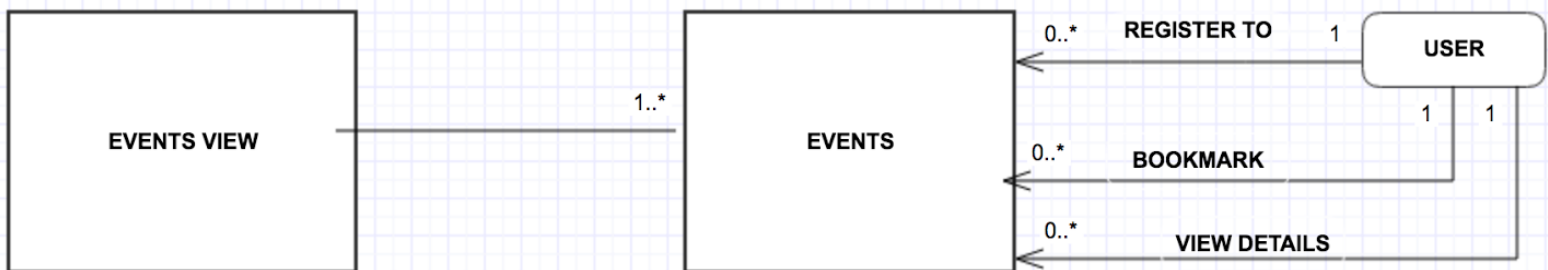

User can login with facebook , google or can manually signIn to the application. In VOLA we are managing users with Firebase.

VIEW EVENTS

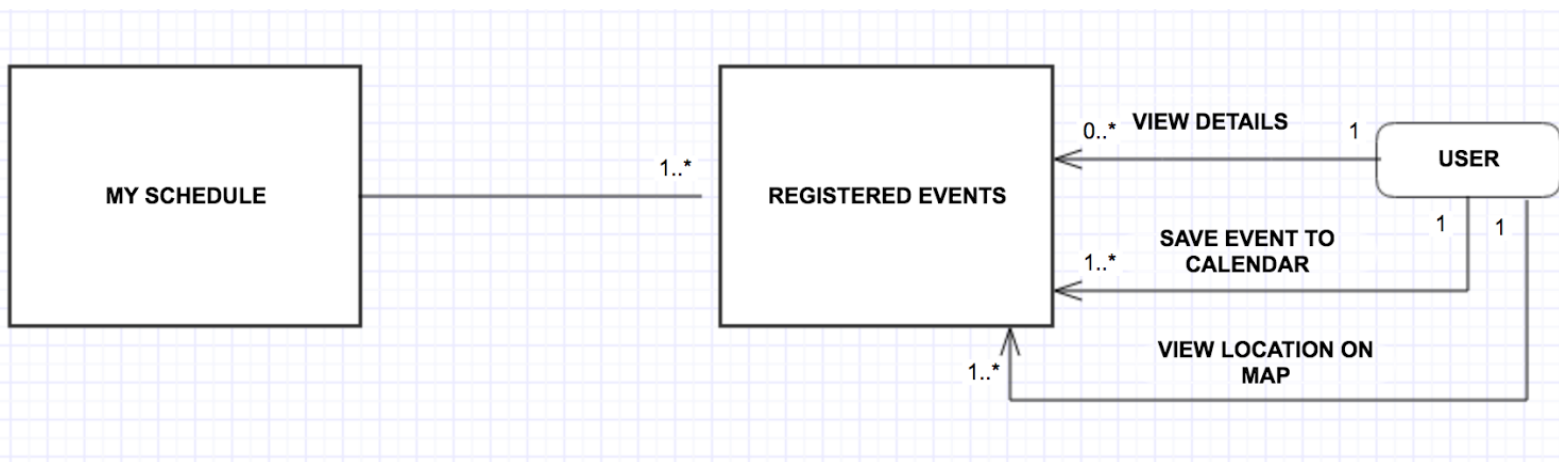

**User can view events in either in ListView or Mapview.
Event's data is stored in Firebase and for maps we are
using Google Maps API.**

EVENTS

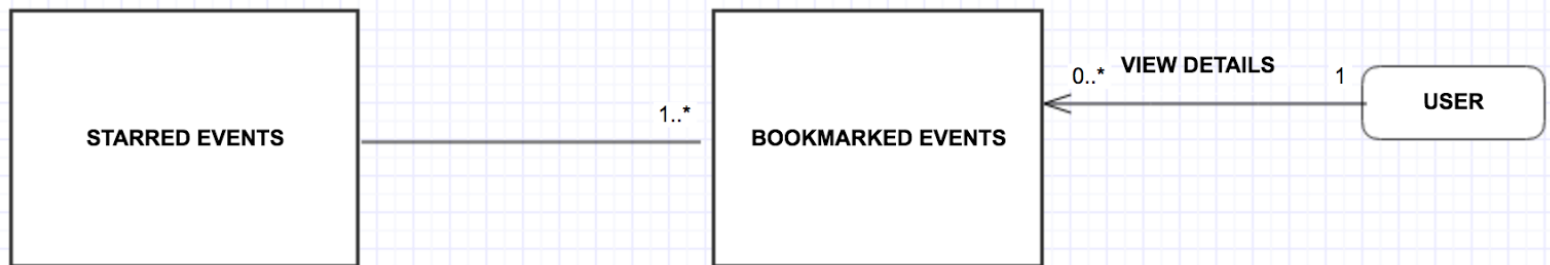

While Viewing events, user can view the details of the event . They can register to an event or bookmark any event only if they are signed in to the application.

MY SCHEDULE

User can see the events they are registered for in “schedule page”. They can save the event to the calendar or view it on the map.

BOOKMARKING EVENTS

User can bookmark any event and these are stored in “starred events”. They can view those bookmarked events anytime.
